

### Pole Selection

For your Seldén Regional Centre to select the correct pole for your yacht, they need to know the desired overall length of the pole (similar to the J dimension), displacement of the yacht and the intended use for the pole.

The displacement guide column of each table shows the suggested upper and lower limits for each pole.

### Further options on carbon poles only

Twaron (aramid fibre) wraps are available on all poles 59mm and above to reduce chafe from forestay, toe rail or pulpit. Painting of poles can be completed on request, this does incur additional costs. Carbon poles can be clear coated to provide improved UV protection at extra cost.

### Bowsprit Selection

For your Seldén Regional Centre to select the correct bowsprit for your yacht they will need to know the desired overall length of the bowsprit extending beyond the bow, and the displacement of the yacht. The bowsprits are not suitable for sails with a tensioned luff (Code 0 asymmetrics).
